

## Sky Valley Property Owners Association Newsletter – August 4, 2018

### Sky Valley Council needs your input

The Sky Valley City Council needs to hear from you regarding the Visitor Center that can bring new property owners to our community.

**At the July 31, 2018, budget planning session councilors recommended closing the Visitor Center.** This person-to-person outreach brings potential buyers and users to our community and improves property values for everyone.

From opening in May 2015 through July 2018, more than 5,374 people have visited the center and received information on area activities, real estate, club membership and more.

Your Property Owners Association has annually supported advertising and promotion of our community through events and joint promotional efforts with the City and Club. The Visitor Center is part of this support. We do not want to see any reduction in our long-term efforts due to short-term views and needs.

**Please contact your City Council members and voice your support for the Visitor Center.** They represent all property owners – not just resident voters.
