

## **Sky Valley Property Owners Association Newsletter – July 10, 2019**

### Internet service survey

A new internet service provider--Clayton Broadband--is conducting an online survey to measure Sky Valley residents' interest in a high-speed network here.

General information is at <https://claytonbroadband.servicezones.net>

If you are interested in the service, the one-minute survey is at <https://claytonbroadband.servicezones.net/SkyValley>

- Enter your address and click the orange "Find address" button
- View your location on the map and click the orange "Take the survey" button
- Provide your contact information, complete the survey, and click the orange "Submit" button to indicate your interest.

There is no commitment to purchase the service; the survey response will measure potential interest and determine if the company builds a network to serve our area.
